4. Data Sources & Methodology

1. Executive Summary

This report presents a comprehensive SEO audit of **www.evergreencleaningservice.ca** for a **Local Service (hybrid): commercial and office cleaning company, one office at 243 Queen St W, Toronto, serving Toronto and 9 GTA municipalities through 11 location pages** site, generated on November 07, 2026. Findings combine technical, content, schema, performance, visual, and search-readiness evidence as available.

82/100

SEO HEALTH SCORE

Critical Issues Found:

1. No named person anywhere: no owner, account executive, author or reviewer, and no Person schema
2. The cost guide gives no real price; the title is now honest but the searcher's question is unanswered
3. Third-party proof is thin: 7 Google reviews, no rating shown, no case study, stock imagery, no citations under the current name
4. Introduced today: the deferred tag loader hides calls from paid visits in Google Ads
5. Introduced today: 'ten GTA municipalities' lists nine; homepage 'every contract since 1989' claim; location pages reuse the same reviews as 'a client'

Quick Wins:

1. Load GTM at once on /lp/* and gclid/gbraid/wbraid visits (src/components/GoogleTagManager.astro)
2. Fix 'ten' -> 'nine other GTA municipalities' and link the four new location pages (commercial-cleaning.md line 190)
3. Reword the homepage contract claim and qualify the 2-hour reply (WhyEvergreen.astro, Hero.astro, llms.txt)
4. Put 'cost' back in the cost guide title; trim six descriptions and two titles
5. areaServed, Durham typing, breadcrumb root, llms.txt, charset header

2. Audit Categories

2.1 Technical SEO

Score: 91/100

What Works

- All 89 crawled URLs return 200; 0 broken or http:// internal links; 0 canonical mismatches; 0 duplicate titles or descriptions
- 60 sitemap URLs all indexable and self-canonical, each dated from its own content; 27 noindex URLs correctly excluded
- Merged posts, /tag/plants/, /insights/page/4/ and /tag/office/page/2/ 301 in one hop; real 404
- Enforced frame-ancestors/base-uri/form-action/object-src CSP plus full report-only policy; HSTS, nosniff, XFO, Referrer-Policy, Permissions-Policy
- verify:indexing 24/24 passed; seo:drift 0 critical; IndexNow live (32 URLs, HTTP 202)

Findings

HTML served without charset Low

content-type: text/html on every HTML route; meta charset present so browsers are unaffected

Recommendation: Add Content-Type: text/html; charset=utf-8 in public/_headers

Report-only CSP lacks hosts the Ads container uses Info

pagead2.googlesyndication.com, adservice.google.com and cct.google missing; enforcing as written would break parts of the Ads tags

Recommendation: Read /api/csp-report and add the hosts before enforcing (~12 Nov)

Content-Signal lines flagged by Lighthouse Low

SEO 92 instead of 100

Recommendation: Owner decision: keep and document, or remove

Two-hop http/apex redirect without trailing slash Low

http://evergreencleaningservice.ca/about-us -> https://www/about-us -> /about-us/

Recommendation: Add the slash in the Cloudflare host redirect, or accept

---

2.2 Content Quality

Score: 72/100

What Works

- Blog pass live: seven retitles, two merges with 301s, named unsourced statistics removed or cited
- Four new location pages with real corridors, building types, drive times and honest 'no office here' lines; 64-69% unique text
- New 2,040-word office cleaning checklist with a definitional opener: the strongest content on the site
- Footer anchors fixed; Mississauga and Vaughan generic copy replaced with local facts; About facts block

Findings

No named owner, account executive, author or reviewer High

0 Person nodes, no founder/employee/reviewedBy; all bylines 'By Evergreen Office Cleaning'

Recommendation: Client supplies names, roles, years, photos; Person schema and reviewer line on guides

Cost guide gives no real price Medium

All figures labelled hypothetical; title now honest

Recommendation: Client: price bands by office size and frequency

Location pages reuse reviews as 'What a client says'; Durham states unconfirmed operations Medium

Edward Sherman (May 2021) on Downtown, North York and Durham; Katchen on two; Handy on two. needsClientReview flags still set

Recommendation: Show a review only where the reviewer is; neutral strip otherwise; confirm Durham or noindex

Homepage 'written into every contract since 1989' claim (introduced today) Medium

Includes a 2-hour reply, which cannot be a contract term; unqualified vs 'during office hours' elsewhere

Recommendation: 'Four commitments we make to every client'; qualify the reply time

Stock-only imagery, no case studies; gallery does not say the photos are stock Medium

Gallery 'illustrates the kinds of work'; projects collection still draft

Recommendation: Label as illustrative stock now; photoshoot and 2-3 case studies

Two leftover unsourced claims Low

Dust-mite figure and typo in day/night post; 'According to experts' in products-not-to-mix post

Recommendation: Cite or delete

2.3 On-Page SEO

Score: 86/100

What Works

- One H1 everywhere; unique titles and descriptions
- 34 of 36 internal-link matrix rows live; zero-inlink posts 13 -> 5
- 18 of 24 post titles carry the brand; eight over-length descriptions fixed; /privacy/ http link gone

Findings

Cost guide title and H1 lost the word 'cost' Medium

'How Office Cleaning Is Priced in Toronto'

Recommendation: 'Office Cleaning Costs in Toronto: How Pricing Works'

Five posts have no contextual inlink Medium

Relocation, fridge, home office, office layout, robotic

Recommendation: Reverse links from related service pages; cluster-based sidebar

New over-length metadata Low

Six descriptions over 160 (4 new locations, /locations/ 185, post-construction); Durham title 68, checklist 62

Recommendation: Trim

2.4 Schema / Structured Data

Score: 86/100

What Works

- All JSON-LD valid by hand-check; SearchAction removed; streetAddress fixed
- New location pages and checklist carry complete Service/WebPage/FAQPage and BlogPosting
- WebPage dateModified equals sitemap lastmod on 23 of 23 pages

Findings

Organisation areaServed omits North York and Scarborough; Durham typed as City Low

10 City entries; Durham is a regional municipality

Recommendation: Add them; AdministrativeArea for Durham

Breadcrumb root 'Home' on three guides Low

Now includes /office-cleaning-checklist/

Recommendation: Use the site name

logo and image are the same banner Low

884x265 banner

Recommendation: Square logo and real photos

2.5 Performance (CWV)

Score: 80/100

What Works

- Mobile home Lighthouse 51 -> 87, simulated LCP 6.85 s -> 2.43 s (median of 5)
- Real visitors pass all CWV: p75 LCP 0.98 s, INP 32 ms, CLS 0.002 (106 beacons)
- Italic font removed from home (-50.6 KB); reveal and hover changes cost no LCP or CLS

Findings

Home field LCP p75 2.24 s, near the line Medium

28 beacons; sitewide figure hides it

Recommendation: Re-check at 14 days; mobile hero preload if above 2.0 s

Google tags still block the main thread 530-610 ms per page Medium

Caps lab scores at 85-89; field INP fine

Recommendation: Container hygiene; longer delay only with the Ads owner

Desktop home CLS 0.014 from font swap Low

section#services, 4 of 5 desktop runs

Recommendation: Metric-matched font fallback

2.6 AI Search Readiness

Score: 74/100

What Works

- Every search and AI crawler user agent gets the full page; identical with JavaScript off
- Homepage definitional opener; question-led H2s on both pillars; About fact block
- Documented email/phone path for agents blocked by reCAPTCHA; llms.txt with Guides and For assistants sections

Findings

Deferred tag loader hides calls from paid visits (introduced today) Medium

Call-number swap (__awcc, 416-803-4880) runs only after tags load; container has no click_to_call trigger

Recommendation: Load GTM at once on /lp/* and gclid/gbraid/wbraid URLs; Ads owner compares call conversions

'Toronto and ten GTA municipalities' lists nine (introduced today) Medium

/services/commercial-cleaning/, a sentence written for AI extraction

Recommendation: 'nine other'; link the four new location pages

Weak off-site entity; profiles under the old name High

No Wikipedia/Wikidata; Facebook, LinkedIn, X slugs carry the old name

Recommendation: Client renames; directory listings

llms.txt omits the checklist and 4 new location pages Low

Service areas lists 7 of 11

Recommendation: Add them with a sync test

2.7 Images

Score: 90/100

What Works

- 212 of 219 images in <picture> with AVIF and WebP; 0 missing alt; 0 without dimensions
- Gallery rebuilt with captions; 640w card variants; legacy 300x150 thumbnails gone

Findings

22 pages share one OG image Low

Including the 4 new location pages

Recommendation: Per-page OG after the photoshoot

Hero slides 2 and 3 have no loading attribute Low

Fetched after load in the lab trace

Recommendation: loading=lazy

3. Action Plan

Phase A: developer, now About a day

- Paid-visit GTM loading and click_to_call comment
- 'nine other GTA municipalities' plus links
- Homepage contract claim and 2-hour qualifier
- Location-page review framing; Durham operational line
- Gallery stock label; two unsourced claims
- Cost guide title; metadata lengths
- areaServed, Durham typing, breadcrumb root, llms.txt, charset
- Internal links to five orphan posts; anchors; footer H2s; tap targets

Phase B: around 12 November Week 2

- Field CWV before/after
- CSP report review and host allowlist before enforcing
- Ads and GA4 week-on-week with the Ads owner

Phase C: client input As supplied

- Named people and Person schema
- Real price bands
- Photoshoot and 2-3 case studies
- Durham confirmation and local facts
- Reviews, rating and months
- Insurance/WSIB evidence; testimonials; clinic IPAC
- Social renames and directory listings

Phase D: account owners Ongoing

- Search Console checks
- Bing Webmaster Tools and IndexNow key
- Cloudflare bot settings

Data Sources & Methodology

Source	Description	Update Frequency
PageSpeed Insights API	Lighthouse lab audit (mobile emulation, Moto G Power, slow 4G)	Real-time
Chrome UX Report (CrUX)	28-day rolling field data from real Chrome users	Daily ~04:00 UTC
CrUX History API	25-week p75 trend data per metric	Weekly
Google Search Console	Search Analytics (clicks, impressions, CTR, position)	2-3 day lag
URL Inspection API	Per-URL index status, coverage state, crawl info	Real-time (2,000/day)
